

## Remote Device Management that's easy to use and easy to buy.

Finally, there's a complete TR-069 remote device management solution for emerging providers of broadband service. It has the same features and functionality as the industry-leading Remote Device Administrator™ and it can be upgraded as the business grows.

Order it online for fast delivery. Now *that's* an easy buy.

**Reach 5000** is a standalone "plug 'n play" remote device management solution based on TR-069 that enables ISP's to provision up to 5,000 subscribers as fast as they sign up. With **Reach 5000** automation, provisioning and customer support costs plummet and ARPU soars because customers are well served. That means the business will grow and **Reach 5000** can grow in capacity right along with it.

**Reach 5000** manages *every aspect of every* CPE that complies with the TR-069 standard: xDSL Modems, VoIP Analog Telephone Adapters (ATAs), IP TV Set Top Boxes, Residential Gateways and TR-069 compliant wireless routers and mobile devices.

With its graphic user interface, the **Reach 5000** is easy to use and fast to deploy. It creates efficiency across the organization to centralize management of service fulfillment, assurance, provisioning and support. **Reach 5000** delivers clear and quantifiable advantages:

**Lowers the cost of provisioning new subscribers**

Automatic instant activation of the CPE and services

**Lowers support call times & improves customers' experience**

Integrated and optimized CSR call resolution interface.

**Increases service adoption & revenue potential**

Services are instantly available and correctly configured, maximizing service uptake and retention

**Scale as you grow**

The **Reach 5000** is scale-able to a full scale ACS solution

**Reach 5000** was developed by Fine Point Technologies, the leader in Customer Experience Management tools. Get the facts on the **Reach 5000** and all the Customer Experience Management solutions available from Fine Point Technologies, visit: [www.finepoint.com](http://www.finepoint.com)
